

KRUTHIKA R GOWDAR

Software Engineering | Python | Backend | AWS | APIs | Git
[+91 7892345542](tel:+917892345542) | kruthikargowdar12@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Computer Science graduate (B.E., CGPA 8.5) with hands-on software development experience through internship and personal projects. Worked with Python, Flask, FastAPI, REST APIs, SQL, Git/GitHub, AWS, debugging, and testing. Developed backend functionality and AI-driven applications with exposure to SDLC, OOP, and Data Structures & Algorithms.

TECHNICAL SKILLS

Programming & Backend: Python, SOL, Flask, FastAPI, REST APIs

Software Engineering: OOP, Data Structures & Algorithms, SDLC, Unit Testing, Debugging, Troubleshooting, Agile

Cloud: AWS, EC2, EKS, VPC, IAM, Linux

DevOps & CI/CD: Docker, Docker Hub, Jenkins, CI/CD, Containerization, Deployment Workflows

Kubernetes: Kubernetes Architecture, Pods, Deployments, ReplicaSets, Services, ConfigMaps, Secrets, Health Probes, Scaling, Troubleshooting

Monitoring & Observability: Prometheus, Grafana, Application Monitoring, Infrastructure Monitoring

Version Control: Git, GitHub

PROJECTS

AI Resume Analyzer - Software Development, CI/CD & Monitoring | [GitHub](#)

Python, Flask, Docker, Jenkins, Kubernetes, Prometheus, Grafana, GitHub

- Containerized a Flask-based application using Docker, with Git/GitHub version control for reproducible development and deployment.
- Configured a Jenkins pipeline with checkout, build, test, Docker image build, versioning, and Docker Hub push stages; validated the CI/CD workflow during development.
- Deployed the containerized application on Kubernetes using Deployments and Services.
- Implemented Prometheus and Grafana for application and infrastructure monitoring, metrics collection, and performance analysis.
- Troubleshoot application, Docker, CI/CD, and Kubernetes deployment issues.

EchoSphere - Deepfake Audio Detection | [GitHub](#)

Python, FastAPI, ECAPA-TDNN, PyTorch, SHAP

- Built a real-time deepfake audio detection system using ECAPA-TDNN speaker embeddings and an MLP classifier, served through a FastAPI REST API.
- Integrated SHAP explainability for interpretable model predictions.

OncoAI - Breast Cancer Detection | [GitHub](#)

Python, Vision Transformer, Transfer Learning, PyTorch, Flask

- Engineered a deep learning pipeline using Vision Transformers and transfer learning, achieving 91% classification accuracy on histopathological images.
- Developed a Flask-based inference application to serve predictions.

PROFESSIONAL EXPERIENCE

Python Full Stack Developer Intern - Dhee Coding Labs | Jan 2026 - Jun 2026

- Developed and deployed full-stack web applications using Python, Flask, and REST APIs.
- Implemented backend functionality and integrated REST APIs for core application modules.
- Worked with application debugging, testing, and deployment workflows.

SPARK AI Research Intern - Subbaiah Research Institute & JNN College of Engineering | Oct 2024

- Developed AI-driven healthcare applications using machine learning and deep learning on real-world clinical datasets.
- Executed data preprocessing, model training, and evaluation workflows.

EDUCATION

G M Institute of Technology | 2022 - 2026

Bachelor of Engineering in Computer Science | CGPA: 8.5

GM Hallamma PU College | 2020 - 2022

Pre-University (PUC) | 80.5%

CERTIFICATIONS

DevOps Fundamentals (DevOps Professional Course) - [Udemy](#)

AWS Cloud Practitioner Essentials - [Certificate](#)

Git & GitHub - [Udemy](#)

Agile Certificate - [Udemy](#)
