PROFESSIONAL SUMMARY

Results-driven Computer Science Engineering student with strong expertise in AI/ML, deep learning, and full-stack development. Proven ability to design, build, and deploy intelligent systems using FastAPI, Flask, and Streamlit. Experienced in developing high-accuracy predictive models and integrating SHAP-based explainability for transparency. Passionate about solving real-world problems through scalable and production-ready applications.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL

Web Technologies: HTML, CSS

Frameworks: FastAPI, Flask, Streamlit, Django

Libraries & Tools: Scikit-learn, Pandas, NumPy, PyTorch, SHAP, Git

Core Concepts: Machine Learning, Deep Learning, Data Structures, OOP

PROJECTS

OncoAI – Breast Cancer Detection System

- Engineered a deep learning solution using Vision Transformers and transfer learning to classify histopathological images
- Improved model accuracy (91%) through data preprocessing, augmentation, and fine-tuning techniques
- Implemented efficient pipeline for feature extraction and model evaluation

EchoSphere – Deepfake Audio Detection System

- Built a real-time deepfake detection system using ECAPA-TDNN embeddings and MLP classifier
- Integrated SHAP explainability to provide interpretable predictions and enhance model transparency
- Designed and deployed backend using FastAPI with a modern interactive frontend interface

Student Placement Predictor

- Developed a machine learning model using logistic regression to predict placement outcomes
- Implemented SHAP-based explainability for feature importance analysis
- Designed an interactive Streamlit-based UI to enhance user engagement and usability

Personal Portfolio Website

- Designed and developed a responsive personal portfolio using HTML, CSS, and JavaScript
- Deployed using GitHub Pages for accessibility and professional branding

INTERNSHIP EXPERIENCE

SPARK AI Research Internship – Subbaiah Research Institute & JNN College of Engineering | Oct 2024

- Worked on AI-driven healthcare applications using machine learning and deep learning techniques
- Applied data preprocessing, model training, and evaluation in real-world scenarios

Python Full Stack with Gen AI Intern – Dhee Coding Labs | Jan 2026 – Present

- Developing full-stack web applications using Python and modern frameworks
- Gaining hands-on experience in integrating GenAI into real-world applications

EDUCATION

Bachelor of Engineering (Computer Science)

G M Institute of Technology

2022 – 2026 | **CGPA: 8.5**

Pre-University (PUC)

GM Hallamma PU College

2020 – 2022 | **80.5%**

Secondary School (10th)

Sri Someshwara Vidyalaya, Davangere

2020 | **89.92%**

STRENGTHS

Strategic Thinking | Analytical Reasoning | Technical Presentation | Creative Design Thinking | Adaptive Learning Agility | Entrepreneurial Mindset (Crochet Business Owner)

CERTIFICATIONS

Django Web Development – Udemy

Built dynamic web applications using Django framework and backend integration

Agile Fundamentals – Udemy

Gained understanding of Agile methodologies, sprint planning, and iterative development
