SUMMARY

Computer Science graduate (B.E., CGPA 8.5) with hands-on experience in Python development, Machine Learning/AI, REST API design, and DevOps fundamentals through applied projects and internships. Skilled in building AI-powered applications, backend services, and end-to-end ML pipelines using modern development, containerization, and CI/CD practices. Seeking entry-level opportunities as a Software Engineer, Python Developer, or AI/ML Engineer, with a strong foundation in data structures, algorithms, and the software development life cycle.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL
- **AI / ML:** Machine Learning, Deep Learning, Computer Vision, NLP, Transfer Learning, Explainable AI (SHAP), Model Deployment
- **Frameworks:** FastAPI, Flask, Streamlit
- **Libraries:** PyTorch, Scikit-learn, Pandas, NumPy, SHAP
- **DevOps & Tools:** Docker, Jenkins, CI/CD, Kubernetes, Prometheus, Grafana, Git, GitHub, Agile
- **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming, REST APIs, SDLC, Version Control

INTERNSHIP EXPERIENCE

Python Full Stack Developer Intern

Jan 2026 – Jun 2026

Dhee Coding Labs

- Developed and deployed full-stack web applications using Python, Flask, and REST APIs.
- Built backend functionality and integrated APIs, contributing to core web application modules using Python and Flask.

SPARK AI Research Intern

Oct 2024

Subbaiah Research Institute & JNN College of Engineering

- Developed AI-driven healthcare applications using machine learning and deep learning on real-world clinical datasets.
- Executed data preprocessing, model training, and evaluation workflows, improving model reliability in a research setting.

PROJECTS

OncoAI | Breast Cancer Detection | Vision Transformer, Transfer Learning, Flask | [GitHub](#)

- Engineered a deep learning pipeline using Vision Transformers (ViT) and transfer learning to classify histopathological images, achieving 91% classification accuracy.
- Implemented image preprocessing, data augmentation, and model evaluation, and built a Flask application for inference.
- Optimized model performance through fine-tuning and hyperparameter adjustments, building an efficient feature extraction and evaluation pipeline.

EchoSphere | Deepfake Audio Detection | Python, FastAPI, ECAPA-TDNN, PyTorch, SHAP, Docker | [GitHub](#)

- Deployed a real-time deepfake audio detection system using ECAPA-TDNN speaker embeddings and an MLP classifier, served via a FastAPI REST API.
- Integrated SHAP explainability for interpretable predictions; containerized the service with Docker.
- Preprocessed and engineered audio features from speech datasets to train and evaluate the detection model.

AI Resume Analyzer with DevOps CI/CD & Monitoring | Python, Flask, Docker, Jenkins, Kubernetes, Prometheus, Grafana, GitHub | [GitHub](#)

- Developed and containerized a Flask-based AI Resume Analyzer using Docker, and implemented Git/GitHub-based version control for reproducible application development and deployment.
- Built a Jenkins CI/CD pipeline integrated with GitHub to automate code checkout, testing, Docker image builds, versioning, and publishing images to Docker Hub.
- Deployed the containerized application on Kubernetes and implemented Prometheus and Grafana for monitoring, metrics collection, and visualization of application and infrastructure performance.

EDUCATION

G M Institute of Technology

2022 – 2026

Bachelor of Engineering in Computer Science — CGPA: 8.5

GM Hallamma PU College

2020 – 2022

Pre-University (PUC) — 80.5%

CERTIFICATIONS

- **DevOps Fundamentals – Udemy:** Docker, containerization, CI/CD pipelines, version control, and deployment workflows.
- **Agile Fundamentals – Udemy:** Agile methodologies, sprint planning, and iterative development.
